S.5	Incentive Mechanisms and	A Proof-of-Stake (PoS) consensus mechanism	
	Applicable Fees	incentivizes validators to secure the network	
		and validate transactions by staking their own	
		crypto-assets as collateral. Validators are	
		selected to create new blocks based on the	
		amount of cryptocurrency they hold and are	
		willing to 'stake', rather than through computational power. If validators act honestly,	
		they earn rewards through transaction fees;	
		however, malicious behavior or proposing	
		invalid blocks can lead to a reduction of their	
		staked assets, creating an economic penalty	
		that discourages misconduct and ensures	
		network integrity.
